• Portfolio: zelda19.github.io/my-portfolio

PROFESSIONAL SUMMARY

Recent IT graduate with hands-on support and networking experience from an internship at a government data center. CCNA-certified in networking and cybersecurity fundamentals, with strong Linux/CLI skills built through independent sysadmin projects. Comfortable troubleshooting hardware, software, and network issues, and quick to learn new tools. Seeking an entry-level IT support or technical role.

TECHNICAL SKILLS

- Operating Systems: Windows, Linux (Arch, Fedora, Mint), proficient in terminal/CLI administration
- Networking: TCP/IP fundamentals, network troubleshooting, static IP configuration, SSH (CCNA-certified)
- Languages: Java, Python, JavaScript
- Web & Frameworks: HTML, CSS, Flask, Flutter
- Databases: MySQL, Firebase
- Tools & Platforms: Git, VS Code, Microsoft Office, Docker
- Game Development: Godot

PROFESSIONAL EXPERIENCE

IT Intern, National Water Resources Board (NWRB) *October 2025 - December 2025*

- Provided hands-on IT support to 50+ employees across departments, including hardware troubleshooting, software maintenance.
- Assisted the IT department with data center operations, including server room monitoring and infrastructure checks, gaining direct exposure to enterprise systems administration

PERSONAL PROJECTS

Self-Hosted DNS & AdGuard Home

- Deployed a DNS filtering stack using AdGuard Home paired as a recursive resolver, eliminating reliance on third party DNS providers

Password Manager - Bitwarden, Caddy, Docker

- Deployed a self-hosted Bitwarden-compatible vault (Vaultwarden) with Caddy as a reverse proxy for automatic local HTTPS/TLS
- Isolated all container state and SQLite data on external SSD storage to preserve host system resources

Inventory Management System

- Built an Excel-based inventory tracking system with automated reorder alerts and a visual dashboard for real-time stock monitoring

Self-Hosted Media Server – Jellyfin Docker – *github.com/zelda19/jellyfin-docker*

- Built a containerized media streaming server with persistent volume mapping for config, cache, and media libraries
- Structured media storage and naming conventions for automatic metadata scraping across movie and Anime
- Enabled multi-user playback across the local network from an external SSD-backed storage layout

EDUCATION

Bachelor of Science in Information Technology *Graduated December 2025*

ICCT Colleges

CERTIFICATIONS

- CCNA: Introduction to Networks - Cisco
- CCNA: Introduction to Cybersecurity - Cisco
